SUMMARY

I am an aspiring Full Stack Developer currently pursuing a Master of Computer Applications (MCA). I have hands-on experience in frontend technologies such as HTML, CSS, JavaScript, and React.js, along with backend development using Python, Flask, and MySQL. I am particularly interested in Artificial Intelligence and Generative AI and enjoy building practical, real-world applications that combine modern web development with AI capabilities.

WORK EXPERIENCE

Tech Intern- Kapil Group Pvt. Ltd. , Hyderabad

March, 2024 – May 2024

- Developed and maintained user interface components for an ERP (Enterprise Resource Planning) web application.
 - Built responsive and user-friendly web pages using HTML, CSS, JavaScript, and React.js.
 - Collaborated with the development team to implement new features and improve existing modules.
 - Worked on dashboard layouts, form validations, data tables, and navigation components.
-

PROJECTS

Job-Portal - <https://job-portal-44s566fyl-vishakhac27s-projects.vercel.app/>

April 2026

A responsive Job Portal UI built using React.js that allows users to browse jobs, view details, and apply through an intuitive and modern interface.

Resume-Analyzer - https://github.com/vishakhac27/resume_analyzer.git

May 2026

Developed an AI-powered Career Advisor web application using Python, Flask, and Groq LLM to recommend career paths and personalized learning roadmaps based on user skills and interests.
